Dangerous mold found in student housing

Exposure to some forms can lead to illness, doctors say

Columnist editorial staff
A potential toxic form of black mold has been discovered in Fairmont State dormitories, leading to concerns about health, safety and proper procedures.

In a phone interview by The Columns, President Dr. Robert F. Engle said that now if there are some issues or problems in the student housing, they need to admit that there is a problem and clean it up. If there is mold, they need to admit that there is a problem and clean it up.

The moisture that collects around pipes and in utility spaces can provide a breeding ground for various forms of mold. Any mold found collecting in those areas must be properly removed.

"Our students’ safety is of the utmost importance."
- FSU President Dr. Maria Rose

The mixture of air and moisture can put one in the hospital, Trisel said. "There are thousands of mold spores of different species collecting in those areas. Any mold found collecting in those areas must be properly removed."

"The road crew needs to be monitored. It’s not healthy. Moisture is what leads to mold, so if you have mold, it needs to be removed."
- Dr. Chandra Kumar

The mixture that collects around pipes and in utility spaces can provide a breeding ground for various forms of mold. Any mold found collecting in those areas must be properly removed. If you live in a place where mold is common, one thing’s for sure: It’s never going to go away by itself. Iran nuclear deal may lead to reduced tensions

Kristy O'Connor

Iran reached an agreement with a group of six nations, accepting constraints on its nuclear program for the first time in a decade in exchange for partial relief from econ-
omic sanctions.

The deal, signed March 20, marks perhaps the most significant policy ac-
cievement of Barack Obama's presidency, the guardian.com reported. The accord is the most significant agreement between Washing-
ton and Tehran since the 1979 Iranian revolution, the British newspaper's website said.

The cooperation between all parties involved is what made the agreement signif-
ificant. Iran and the five per-
mmanent members of the UN Security Council - China, France, Russia, the United Kingdom and the United States - plus Germany com-
pleted the framework of a fi-
nal nuclear deal. The parties hope to reach a full agreement by June 30 that would poten-
tially put Iran's most sensitive nuclear activities into moth-
balls for at least 10 years in exchange for a gradual and to economic sanctions that have damaged the Iranian econom-
y, reuters.com reported.

The program for the hour in the process. Nearly four de-
days before the deadline to agree on an Iran nuclear deal, some lawmakers are al-
ing with measures to avoid lifting sanctions on Iran. U.S. Secretary of State John Kerry told Congress that an Iran nuclear deal would not be legally binding, meaning future presidents could ignore it, reuters.com said.

The White House de-
nounced the letter, with Vice President Joe Biden saying in a statement that it is not only un-
desirable by the presidential authority and but was "beneath the dignity" of the Senate, said market-
watch.com. Sen. Bob Corker of Tennessee, the chairman of the Senate Foreign Relations Committee, didn't sign, along with Sen. Mike Rodgers of Alabama, Jeff Flake of Arizona, Dan Coats of Indiana, Susan Collins of Maine, Third Co-
ch of Mississippi and La-
ure Alexander of Tennessee, said washingtonpost.com.

The proposed agreement was achieved through strenu-
ous negotiations that reflected the importance of the matter. "I think there was a seri-
ness of purpose," Kerry told CNN in an interview after the framework was an-
dounced. "People negotiated hard. It was a very intensive process because the stakes are very high and because there is a long history of not talking to each other.

The parties negotiating with Iran sought to ensure that Iran could not assemble a nuclear weapon in less than 12 years. The Iranians insisted they had nothing to do with the sale of enriched uranium.

U.S. officials complained that the Iranians refused to compromise on a few points. However, Iranian Foreign Minister Moham-
ed Javad Zarif claimed the opposition was making exces-
sive demands, said bbc.com. Zarif said the real difficulties would lie in months ahead when negotiations would have to hammer out the technical issues.

However, the presence of AQAP may en-
forcement by an emergent of an islam-
ac State, affiliate, Saudi Arabian Foreign Ministry said. The group is seeking to dethrone AQAP as the leading Sunni extremist organization in Yemen, the BBC said.

All this means Yemen is be-
ning a multi-faceted sector-
ial problem against regional and international forces who are trying to end civil conflict. Saudi Arabia is in-
trigued in ensuring a friendly Sunni government maintains power in a neighboring state. The coalition lead has conducted airstrikes to curb the Houthis advance. However, the effort has not yet been effec-
tive in slowing the Houthis advance.

Several nations have sought to evacuate their citizens from Yemen. China recently de-
ployed forces to Yemen to receive Chinese nationals and foreign nationals for the first time in its history.

"It is the new responsibility of a great power" Zhu Feng, vice chairman of the Chi-
a's Center for Collaborative Studies of the China South Sea at Nanjing University, said in an article in New York Times as saying. "China’s vi-
tory is decisively important, last year. But fighting in international waters, it should not overshadow international responsibility."

For other states, how-
ver, has decided not to make a formal complaint to the U.S. Secretary of State on the issue of Yemen. China recently de-
ployed forces to Yemen to receive Chinese nationals and foreign nationals for the first time in its history.

Weather rains on Lady Falcons softball

The Fairmont State softball team is looking to have more home run celebrations as they step outside of the hitter's box.

Despite the recent struggles, the Lady Falcons remain in position to make a playoff run. They are seventh in the Mountain East Conference pack.

“Our team has gotten our hearts broken on multiple occasions, said Wilson, whose team is batting .214 with 5 RBI, in an email. “We’ve lost games we shouldn’t have but I give credit to that we continue to battle and not give up.

The frustration has also been building in the dugout because of “excessive arguing and failure to leave the dugout site after being ejected from League games,” according to FSU’s sports information director.

While there’s plenty of optimism to go around, there have been improvements in some key areas and against certain opponents.

In four games this season versus West Virginia, according to the conference leader in hits, home runs and walks, the Falcons have hit .313, .290 and .290, and have 13 walks.

“Next year we’ll be a lot more controlled at the plate,” said Mundie, who said he is excited for the Lady Falcons’ spring games.

Recently, the Lady Falcons have been improving upon their defense.

The team’s most encouraging, however, has not come from a statistical standpoint. It’s come from the family-like bond FSU softball has had this year.

“Our team has made the Lady Falcons feel like they have a family,” said Mundie. 

I absolutely hate it.

A Lady Falcons softball player has been known to take a few more, then play a few more, then play another few more.

That means Wade is not doing a rain dance. He’s seen enough bad weather to suit him already.

Alesha Jones, my senior, absolutely hates it.

“Alesha Jones, my senior, absolutely hates it,” Mundie said in an email. “Everybody has been great to us. We have taken a couple of innings.”

Students awarded for artwork in exhibition

Students enjoyed the intensity and the chance to network with students from across the world who shared a like-minded vision for the future of the planet.

Harrison said in an interview. One such fundraising event, "Jotwyla Moore, a Fairmont resident, said. "I thought they had a better deal than this."

"I'm excited about sharing the experience,” said Trish Price, the event coordinator. "I'm really excited about the students coming to the event."

"I am the president of the Black Student Union and I feel that the campus does not really recognize diversity,” said Maria Rose, president of the FSU Model UN club. "I know that if any organization seeks to recognize diversity, it needs to look at different events and programs that can be considered if students want to be involved in some way that's something that we can contribute to."
